Information Security and Information Assurance

We are a provider of tailored Information Security solutions supporting the Energy, Finance, Government, Telecommunications, Healthcare and Service Provider industries throughout the UK and overseas.

Our well informed and qualified team of security professionals are able to provide effective and targeted advice obtained through years of practical experience that allows you to meet and comply with the Information Security demands associated with operating in highly regulated environments.

Specialist areas include:

- ISO27001:2013 certification or compliance with this internationally recognised security framework, we will help you to meet internal business objectives, contractual obligations or regulatory requirements.
- Smart Energy Code –security obligations for providers of Smart Meter services. Our expertise in preparing for SEC User security pre-assessment or full user security assessments will provide you with the necessary confidence prior to the CIO undertaking your full user security assessment.
- PCIDSS – we will help you meet the requirements of the Payment Card Industry Data Security Standard (PCIDSS)– assist in identify what elements of your network infrastructure come into scope and help you meet the specific requirements of all 12 high level domains.
- CAST certification for Telecommunication / Service Providers. Our knowledge in this field will help you implement or extend your ISO27001 security framework in order to meet the additional security controls and address the stringent service availability requirements prior to your certification or re-certification audit.
- Cyber Essentials Certification – extensive first-hand knowledge of this Government backed entry level Cyber Security Assurance Framework. We will help you establish fundamental measures in order to protect your IT infrastructure. Our experienced staff will guide you through this process and when you are ready, move from ‘Essentials’ to Cyber Essentials Plus’.
- Cloud Certification - for businesses wishing to demonstrate good security across their Cloud Services, we will help you prepare and move towards Bronze, Silver or Gold certification. Provide specialist advice in preparing your ISO27001 framework, in order to measure your level of maturity using the CSA Cloud Security Matrix.
- Healthcare – for those seeking to complete an annual NHS Information Governance Toolkit attestation, we can provide guidance on how to successfully navigate this on-line process to ensure continued access to NHS network services.

Our Consultants

Our team of consultants are all experience, qualified and/or certified Information Security Practitioners, many of whom are ex-CLAS consultants. Qualifications and certifications include: ISACA CISA, CISM, CRISC, ISO27001:2013 Lead Auditor, SABSA SCF, Cloud Security Alliance – Security Trust & Assurance Register (C-STAR), IISP C ESG Certified Professional - (CCP– Auditor), amongst others. All of our consultants are experienced information security practitioners with demonstrable practical application of information security standards for a number of clients across many different business sectors.
